Self Definition

I'm a Full Stack Developer with a strong foundation in both technical skills and soft skills. My coding proficiency is complemented by effective communication, problem-solving, and teamwork abilities. I understand the importance of a well-rounded approach to software development, and I'm ready to contribute my skills to the team.

Strength

In the last year I gathered experience with JavaScript, React, MongoDB, PostgreSQL, Java and other frameworks. Now I have a strong foundation for both front-end and back-end development.

Mentor Opinion

"Passionate about OOP, classes and interfaces, Alin enjoyed all topics studied throughout this course. He prefers Java for the safety and extendability of the code, and shows a high interest in any topic related to programming. He's also interested in mobile development, with his next project being a native Android application. "

— *Octavian Popoviciu, mentor*

Hard Skills

HTML5 — Java — Javascript — Mongo DB — Node JS — PostgreSQL — React — Spring Boot

Recent Projects

GOBIZ - ECOMMERCE

https://github.com/AlinDedu/gobiz
The project is a React/Node.js Full Stack web ecommerce. It provides theme switch using Chakra UI, state management using Redux, as well as payment options using Stripe.js. The project is fully functional and deployed, but it's still improved.

CINEMA CENTRAL

https://github.com/AlinDedu/cinema-central-AlinDedu
Cinema Central Application is a Spring Boot and React application that provides user authentication and authorization functionalities using Spring Security and JWT (JSON Web Tokens). It allows users to register, log in, check movie details, watch trailers and access protected resources (comment, moderate comment) based on their assigned roles.

MARS EXPLORATION

https://github.com/AlinDedu/mars-exploration-java-AlinDedu
This project simulates the exploration and colonization processes on Mars. It provides a simulation of rovers exploring the Martian surface and a subsequent colonization phase.

Work Experience

Military Police (2018 - 2021) — Ministry of Defense, Brasov, Cristian

Education

Full Stack Developer (2022 - 2023) — Codecool Romania
Food Industry Technician (2011 - 2014) — Victor Frunza Technical High School, Buzau, Ramnicu Sarat

Spoken Languages

English — Upper Intermediate
